

***Next Chapter Meeting  
Tuesday, 28 Feb 2017, 11:30 AM***

**Laura Militello, Steve Wolf, John Hendricks  
Augmented Reality Training for Combat Medics  
and Civilian EMS**

**Tuesday, February 28th 2017, 11:30am - 12:30pm  
at Tec^Edge, 5000 Springfield Street, Suite 100 Dayton, Ohio 45431**

Topic. Augmented reality makes it possible to superimpose visual and audio cues onto the real world. Unveil, LLC is developing augmented reality training for combat medics and first responders. We are leveraging the portability and realism of augmented reality, and combining it with research findings on the acquisition of expertise to create highly engaging training for rare, but critical events. In this presentation, we will provide a brief background about our theoretical approach and demonstrate our augmented reality training tools. We look forward to a lively discussion.

About the Speakers. Laura Militello is a human factors psychologist who has studied decision making and expertise in military and health care domains. She is a leader in the naturalistic decision making community, and has studied decision making and expertise for over 20 years. Steve Wolf, who also has a background in human factors psychology, is the CEO of Unveil, LLC. He provides strategic direction. John Hendricks is VP of Product Development at Unveil. His background is in fine arts, and he has extensive experience building AR applications for marketing and gaming.
